

*Color Specifier For Hurd Aluminum  
Clad Windows & Patio Doors.*

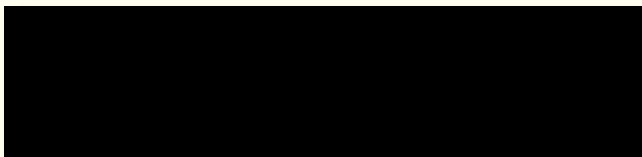

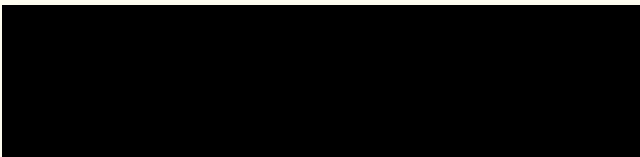

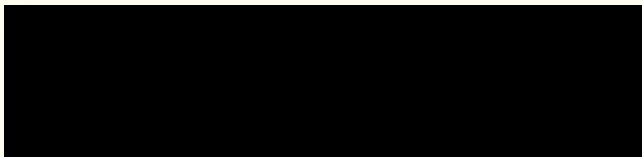

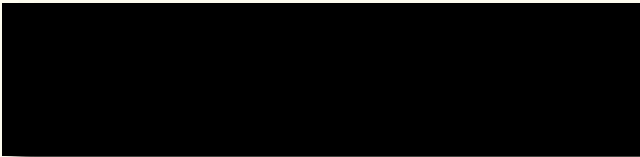

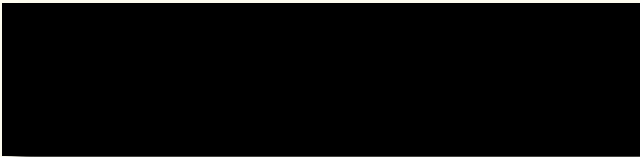

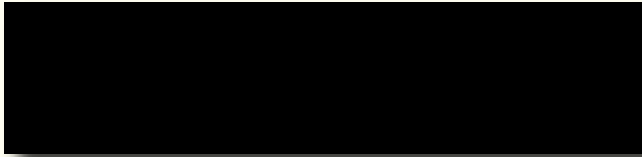

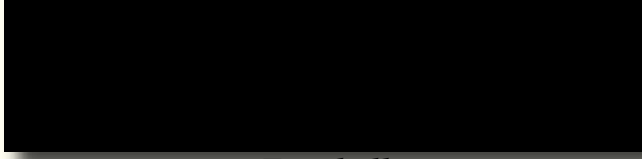

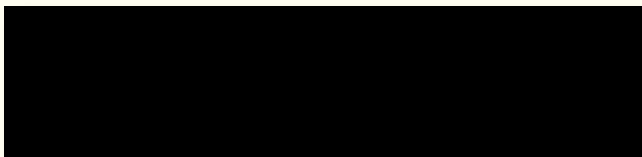

***Hurd***  
*Windows and Doors*

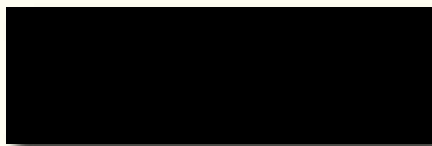

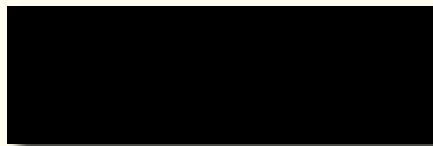

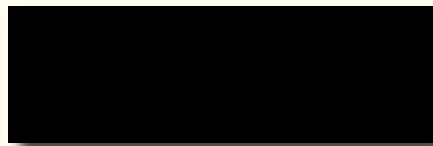

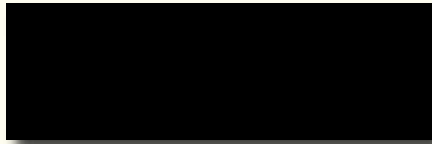

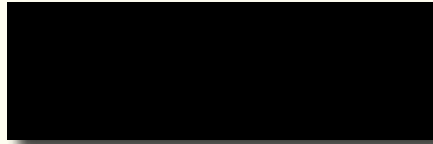

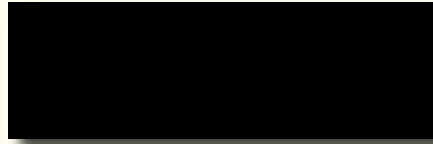

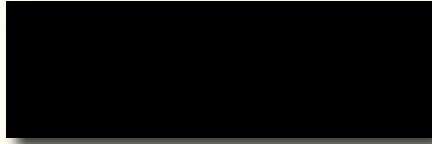

## Find Your Favorite Color.

You'll find some nice surprises in our aluminum cladding colors. First, only Hurd lets you choose from 5 new metal anodized finishes as standard. Second, check out the 5 new mica finishes in our Special Palette. These mica finishes have the flake, depth and shimmer to simulate a metallic finish. Third, all Hurd clad colors meet AAMA 2603 standards. You can also order your cladding to meet commercial grade AAMA 2605 standards—which we recommend for coastal applications due to salt spray and extreme conditions. Fourth, if you don't find the perfect color in this chart, we'll custom match any color you'd like as a special order.
