

Solid Wood Windows and Entrance Systems

www.norwoodwindows.com

Our selection of Doors

Norwood doors specialize in dramatic entrances.

The luxurious texture of real wood, refined sensibilities of quality metal fixtures and superb craftsmanship down to the most intricate detail are sure to grab the attention of even the most detached observer. Whether you are looking for security, energy efficiency, or that certain indefinable “wow” factor, we are confident that our impressive selection of fine interior and exterior doors will outshine the competition in every aspect but one – price.

First impressions are often difficult to forget. Let the entrance to your home or office leave one that your guests will remember forever - for all the right reasons.

SOLID WOOD FRENCH DOORS

Open up your indoor world through the traditional elegance of Norwood's French Doors. Appreciate the many security, convenience and energy-saving features built into this modern version of a timeless classic. Attractively-proportioned Bright Brass handles (other finishes, page 43) operate a three-point locking system. Generous weather stripping, and a bronze anodized aluminum-clad sill complete the picture. Optional wood sills are available.

◆◆ HARDWARE OPTIONS

Viking

Romance

Allegro

Capri

Our door hardware is available in a variety of finishes. See page 43 for more details.

Centre hinging is also available as shown here.

Matching Sidelites help make this French Door a delightful addition to this bedroom.

French Door with solid panels and horizontal grilles.

It's a door. It's a window.
It's a great idea!

Being half of each, the Garden Patio Door gives you the option of full length window ventilation with the look of a door. The venting side is completely screened and easy to operate.

Magnetic and compression weather stripping and a bronze anodized aluminum-clad sill ensure superior weather protection. Garden Doors are available in five- or six-foot widths and can be combined with Half-Rounds, Ellipticals or Transoms.

◆◆ FEATURES

Norwood quality hardware ensures smooth opening and secure closures.

Brass lockset with deadbolt.

SLIDING PATIO DOORS

Seeing the big picture!

The Norwood Sliding Patio Door features giant panels of unobstructed view – easy to operate, energy efficient and secure. Available in five-, six- or eight-foot widths and two different heights, a tandem steel ball bearing roller system keeps our Patio Door sliding. The harder the wind blows against the outer sliding panel the tighter it seals itself into the weather stripping. A small point, but typically Norwood. As is the solid wood frame and tamper proof inside locks.

◆◆ HARDWARE OPTIONS

Optional Patio Door deadbolt for ventilation with security.

Handles

Bright Brass

Brushed Chrome

Antique Brass

◆◆ FRENCH WIDE STILE

Add a different style with French Wide Stile patio door panels

Attractive. Secure. Energy efficient.

Your main entrance has to say welcome to guests but resist unwanted visitors and protect against the weather. Norwood Steel Entrance Systems are available in a variety of styles and sizes (consult dealer). All are made from rugged, primed, galvanized steel with a polyurethane core and wood stiles and rails for thermal break. Each door also contains a bronze anodized aluminum-clad sill with thermal break.

◆◆ OPTIONS

Optional concealed door closer.

SOLID WOOD ENTRANCE SYSTEMS

Entrances make important statements

about you and your home. Our talent for creating truly unique designs from a large variety of wood types, decorative glass and grille options, and then finishing them in over 160 decorator colours and stains, lets you say 'welcome' with a true sense of individuality and style. Whether you choose from one of our existing designs or let us create your own design, your door will be made to withstand the harsh realities of the northeastern coastal region and will keep your home comfortable and secure for generations.

◆◆ OPTIONS

Optional raised mouldings are a quality touch point

Solid Oak or Mahogany sills are also available.

We offer various sill types.

As shown below, our standard sills are Bronze Anodized with an Oak crown. Solid wood sills are also available in Oak or Mahogany. Our barrier-free, low-profile sills are available in a Bronze Anodized finish, but only as outswing. We can also incorporate custom and architectural sills to suit your design.

Specify swing direction.

Choose panel and raised moulding types.

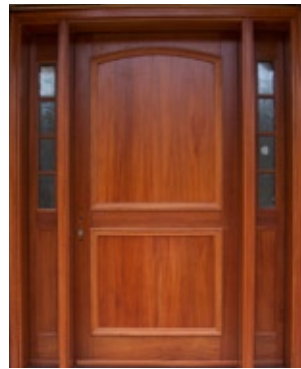

Choose your hinge types and finishes.

Order custom jamb extensions.

Choose your sill type and finish.

With a 60-year tradition of fine woodworking behind us, we specialize in creating outstanding wood entrance systems with 'outside-of-the-box' thinking and a zest for challenge. With Norwood, choice is the operative word.

The warmth of wood, finely crafted with raised mouldings and decorative glass, states that your home, without question, is never ordinary.

Our talent and flexibility – not to mention installations through some of North America’s most talented architects – have opened a lot of doors for us.
