LACANTINA DOORS

Embrace New Space

ALUMINUM WOOD SYSTEM

Our newest design innovation, the Aluminum Wood system delivers everything you would want in a door system. A low maintenance exterior with the beauty of a real, natural wood interior, combined with concealed multi point locks. Featuring 2 1/4" thick panels and the ability to be built up to 52 feet wide and 10 feet high.

ALUMINUM SYSTEM

Strikingly clean and narrow, our Aluminum system features a 2 3/4" stile and rail profile allowing for more glass and light. Suitable for both residential and commercial projects, the Aluminum system is available in a clear or dark bronze anodized finish, and can also be custom color matched.

ALUMINUM THERMALLY BROKEN SYSTEM - NEW 2010

For extreme climates, LaCantina Doors has a new Aluminum system with thermal performance. Its sleek design with 2 1/4" thick panels and a thin 2 3/4" stile and rail, the new thermally broken Aluminum door is designed to suit DP55 testing and impact ratings. Manufactured to any design specification this door can suite large openings up to 52 feet wide and 10 feet high.

CLAD SYSTEM

Featuring a custom extruded aluminum exterior and solid core construction, the Clad system is our wood product that withstands weather conditions with a exterior cladding that can be custom color matched. One of our most popular options, the Clad system has a preferred 3 5/8" narrow stile and rail profile, allowing a perfect balance of light and glass into your space.

WOOD SYSTEM

The original LaCantina Door system, and still one of our most popular, natural beauty in its purest form. Our all Wood system is available in your choice of Vertical grain Douglas Fir and Mahogany. Ready to seal or stain, let your all wood LaCantina Doors be the highlight of any space. Custom wood species can be sourced to match your design requirements.

2008 AIA Honor Award Central Coast Chapter, California

An extension of a family home that is almost square in plan. The space flows horizontally from the existing kitchen into the living room, then up the open stairwell.

LaCantina Doors open wide to allow interweaving of outdoor and indoor space characterizing a uniquely Californian way of living. There is a breezy informality that takes you from the highly polished concrete floors inside to the slightly more textured concrete of the patio. Blending the indoor and outdoor living room with the same concrete floor surface extends the perceptual size of the room.

THE BENEFITS

- **Visually appealing** streamlined design, featuring narrow stiles for more glass
- **Competitive pricing**, whether taking advantage of standard sizes or "made to measure"
- A product line that is **designed to suit any residential or commercial application**
- Thermally-broken designs and glass options for **optimal energy performance**
- Single lite door panels up to 39" wide and 10' tall **without horizontal mullions**
- Patented **Zero Step Sill** technology for flush floor transitions from the interior to the exterior without sacrificing performance
- Top hung or floor rolling
- **Screening** solutions that include solar and privacy options
- Industry leading **time from order to delivery**
- **Complete systems** with **installation instructions** for straightforward assembly and **ease of installation**
- 3 dimensional **easy adjustment** access using just a screwdriver
- **10 year** limited warranty across our product lines
- Over 15 years of manufacturing experience **and innovation** built into every LaCantina Door
- **Extensive testing** to meet AAMA standards
- True **FSC** chain of custody manufacturer
- Manufactured in the USA
